Extra value! Buy \$1.00 worth and be convinced. We also sell you good mixed Tea at 4 lbs. for \$1.00.

**E. A. BAKER & Co.**

## THE DOMINION HOUSE.

Small Attendance at Re-Assembly.—Seals for Hudson Bay.

OTTAWA, May 23.—Comptroller Wool introduced a bill to prohibit sale of honey made from glucose as genuine honey. It places vinegar and Paris green on list of articles subject to analysis.

Haggart admitted that contracts for Shicks Island dams in St. Lawrence were awarded D. H. Davis without tender.

The House went into committee of supply and discussed salary of High Commissioner. McMullen described Sir Charles Tupper as "a political Balshazzar" and pointed out that during the past five years the Tupper family had drawn \$165,000 from the public treasury or over \$106 per day.

OTTAWA, May 28.—Only forty members were present on assembling of House.

Blanchard (Gloucester) was introduced by Thompson and Costigan.

The Tilsman divorce bill was passed. Mills (Bothwell) moved a resolution asking Government to introduce Pacific fur seals into Hudson Bay. Tupper said scheme was impracticable and owing to destructive character of fur seals their introduction might injure cod and other fisheries of Atlantic coast. Stairs supported Tupper's view. Mulock moved second reading of his bill compelling electric railway companies to provide shelter for motorcars while on duty. Haggart supported the bill.

Foster gave notice of following tariff changes: Wrought iron or steel pipe fitting and chilled iron or steel rolls, 35 per cent. ad valorem; switches, frogs, crossings and interconnections for railways, 30 per cent. ad valorem; yarns composed wholly or in part of wool, worsted, the hair of the Alpacas goat or other like animals, costing 20 cents per pound and under, 5 cents per pound and 20 per cent. ad valorem; mosaic flooring of any material, 30 per cent. ad valorem.

OTTAWA, May 29.—Thompson introduced a bill to shorten time between nomination and polling day in certain constituencies.

Foster moved House into committee on tariff resolutions. The duty on cocoa and cocoa shell was changed from 25 to 20 per cent.; on strawboard from 40 to 30 per cent. The word "medicated" was struck off the item imposing a duty upon cod liver oil, and the rate on silvered glass was changed from 30 to 27½ per cent. A number of changes were made in the classification of iron and leather goods. The duty on emery wheels was fixed at 25 per cent.

Taylor made an appeal for the restoration of the old duty on bolts and nuts as the changes would practically shut up the factory at Gananoque.

A sharp discussion took place occasioned by the absence of N. Clarke Wallace at Orange Grand Lodge.

Cartwright wanted to know why the comptroller was allowed to neglect his duties for the performance of which the country paid him and whether the Prime Minister had given him permission to go to the Grand Lodge meeting. Thompson declined to answer, and Landreth urged that the matter be referred to Solicitor-General Curran.

Mr. Foster gave notice of the following proposed resolution: That it is expedient to provide that the Governor-in-Council may enter into a contract for a term not exceeding ten years with any individual or company for the performance of a fast weekly steamship service between Canada and the United Kingdom, making connection with a French port on such conditions as to the carriage of mails and otherwise, as the Governor-in-Council deems expedient, for a subsidy not exceeding \$750,000 per annum.

## Government Bids Leased.

OTTAWA, May 30.—To day Hon. J. C. Patterson, Minister of Militia, told Nicholas Flood Davin, M.P., that he had decided to yield the point pressed so long by the member for Western Assiniboia, namely to lend rifles to the rifle associations of the North-West Territories. Mr. Davin has handed in the names of the rifle associations at Regina, Moose Jaw and Medicine Hat.

## Our Delegate at the Capital.

OTTAWA, May 30.—Messrs. Jas. H. Ross, Speaker of the Northwest Legislative Assembly, and T. B. Baker, delegates from Moose Jaw, arrived here yesterday and in company with Mr. Davin interviewed Hon. Thomas Mayne Daly, Minister of Interior, and Mr. Burgess re grant of money to the Moose Jaw dam embankment. They will see Sir John Thompson and Hon. Mr. Oimont to-morrow.

## Orange Grand Lodge.

LINDSAY, May 30.—The thirty-fifth annual session of the Grand Orange lodge of British America opened here yesterday afternoon with over 300 representatives present, embracing every province in the Dominion. Hon. N. Clarke Wallace, grand master was in the chair.

## Very Profitable.

The friends of a certain clergyman living in a neighboring town are joking him about his domestic circle. His wife lately presented him with a daughter, and the same evening his driving mare had a foal, his cow had a calf and his cat had five kittens.—Roisseau Globe.

## Thanks "Boston Mail."

The trial of Mr. Erasmus Wieman, upon charges preferred against him by his former partners in the firm of R. U. Dun & Co., begins in New York on Monday, the 11th of June. It is expected that some interesting revelations regarding the internal working of commercial agencies will be made at the trial. General B. F. Tracey, who will be chief counsel for Mr. Wieman's defence, is confident his client will be honorably acquitted.

## Glass Factory for Canada.

The Dominion Government some days ago, received a letter written in German from Josef Wendler, of Haidi Germany in which he asks information respecting the removal of his large glass factory from that town to Canada. He points out that the trade of his house is mainly British and American, but heavy taxation of his industry in Silesia and the Socialistic tendencies of the country are interfering so disastrously with his business that he is desirous of removing with 600 families, whose heads are employed in his works, to this country. The letter has been handed over to His Worship Mayor Cox, who will endeavor to have the Council take action in the direction of securing the factory in Ottawa.

## A Narrow Escape.

Regina had a narrow escape from another serious fire on Friday last. R. B. Ferguson, the furniture dealer, left his office during the forenoon for the purpose of going for his mail, but before reaching the post office remembered something he had left behind and returned to his shop and it was fortunate that he did so, for a match or cigar-stump dropped in the waste-paper basket had ignited its contents, and the flames were already creeping up the wooden walls. A few pails of water extinguished the fire, but a delay of five minutes would have permitted sufficient headway to be gained to have cleaned up two blocks of wooden buildings in the busiest part of the town.

## CARNEL NEWS.

Mr. John Smith was trying to ride a pony the other day after the broncho muster had been thrown. He had just mounted and asked for a switch when he was thrown violently into the wood pile.

A large congregation turned out on Sunday to hear Rev. Mr. Abbott, who preached an excellent sermon.

The other day one of the ladies of this district was driving a vehicle that had lately been repaired. She drove too near the edge of a pond and took a plunge into the water. She was speedily rescued and is now none the worse of her accident.

## CHURCH.

### Naval Schools in Canada.

Capt. Edward Palliser suggests in a letter written to the London Times that Canada has, in passing a patriotic militia act, a splendid chance of manning the navy. She occupies, he says a most important strategic position in the Empire, both on the Atlantic and on the Pacific coast, and has 40,000 harbor seamen, from which reserves of trained men could be formed to maintain that position. A leading Canadian statesman, Capt. Palliser asserts assured him that the formation of naval schools in Canada would be a most popular move.

### Don't's for Dairymen.

Don't expect to get pure milk from impure food or water.  
Don't think scrub sizes can produce choice stock for any purpose.  
Don't keep calves in dark, filthy places and expect them to thrive.  
Don't make your cows drink water that you could not drink yourselves.  
Don't feed a calf grain before it chews its cud.  
Don't try to be called a large dairyman by the number of cows you keep.  
Don't keep a cow a month before testing her to see if she pays her way.  
Don't think that strainers or separators can take soluble filth out of milk.  
Don't run or worry cows going to or from the pasture or in the milking yard or stable.  
Don't pasture your cows so that they must work every hour of the day and night to get enough to eat.  
Don't forget that a cow is decidedly a creature of habit, and in all ways try to conform to her peculiar habits.  
Don't feel that your cows are wasting time if they lie in the shade and chew their cuds for a few hours each day.  
Don't leave cows with cracked or sore teats day after day, and then blame them because they kick while being milked.  
Don't estimate the value of a cow by the amount of milk she gives, but rather from the amount of fat per hundred.  
Don't think you can buy a better cow than you can raise. If you can you have missed your calling, and you are not a born dairyman.  
Don't expect to get something from nothing and let your cows just live, but rather furnish something in the way of food to make milk.  
Don't carry filthy, rotten milk to the factory and then as around the grocery and tell that the cheese or butter maker doesn't know how to make good goods.  
Don't be in too great a hurry to see a calf grow and try to make this growth by giving all the milk it will eat, for you can easily, by overfeeding, spoil a month's growth.  
Don't have the cows out on a cold rainy day or night in June when they have just gone to pasture with hair all shed off, and nothing but fleecy, tender grass inside of them for food. Better by far keep them dry and warm in the stable without food if you are so unfortunate (or selfish) as to be out of the way.

## THE CREAMERY INDUSTRY.

Prof. Robertson has come and gone. The people of this District have had an opportunity of hearing from him a lucid statement of the great advantages which will accrue to them and to this district generally from energetically taking up dairying. His life's work is to keep himself informed as to the best methods to be pursued in connection with this industry; and he has told us that the success of this matter is assured, in consequence of the action taken by the Government, if only there will be thorough co-operation on the part of the people here—a plentiful supply of cream delivered at the factory under the most favorable conditions for the turning out there of "gilt edged" butter.

And now can it be that this intelligent co-operation will be lacking? Can it be for one moment entertained that this splendid opportunity for the development among us of this important industry for which this district is so suited, will not be heartily embraced? The mere asking of such a question, and thinking over what would be involved in any other reply, shows the utter folly of which every one would be guilty who does not heartily respond to this call for co-operation. It is an opportunity that very seldom presents itself for the farmers and stock raisers to benefit themselves and their district.

It is not, however, solely by the quantity of cream which will be delivered at the factory by them that this intelligent co-operation will be tested, but quite as much by the manner in which it will be delivered—the perfect cleanliness which will be observed by each person in regard to it at every stage, cleanliness of person and utensils, the having it delivered under such conditions as will render possible the making of butter of the best quality. This cannot be too much emphasized. Anything short of this is so much less than the intelligent co-operation which is needed. Lack of this through cleanliness, the non-observance of any of these conditions, will render futile the best efforts otherwise made to make this industry a success.

Its prosperity will much depend upon the manner in which it will be operated here by every one who has to do with it. The Government, after the announcement made by Prof. Robertson, will doubtless do its share in the light of the most improved methods in vogue. Will the patrons do less? Or will they not heartily respond and perform their parts with alacrity and thoroughness? The chief benefit to be derived from the industry will be theirs. If so, this Creamery Station will in the near future be the fruitful parent of many other such centres of remunerative occupation; and the people will no longer have to be found committing the mistake of carrying to market all of their eggs in one basket.

## EDITORIAL NOTES.

According to the annual report of the Minister of Trade and Commerce, the trade of the Dominion has materially increased during the past year, the aggregate being six million dollars above the highest ever before recorded. This big leap is all the more remarkable as the past year has been one of nearly universal depression in other countries.

A correspondent from Mahone Bay writes that a very modest and absent minded young lady went to a store at that place for some flour. She gave the clerk what she thought was a neatly folded and ironed pillow slip. The clerk unconsciously emptied one scoop of flour in and it went right through to the floor. Just then the horrifying discovery was made that what had been taken for a dainty little sack had two outlets, and each outlet was trimmed with embroidery. The clerk fainted and has been in that condition ever since.—Ex.

The scheme of Lieut.-Governor Macdonald to have a Territorial Exhibition in 1895 will probably be carried into effect. The Canadian Pacific Railway and other influential corporations have promised to give every assistance in their power. Sir John Thompson and Hon. T. M. Daly are in hearty sympathy with the project and will give it what financial aid the finances of the country will admit; and there is no doubt a substantial grant will follow this cautious promise. The Northwest Executive, and the bulk of the members of the Assembly will actively promote the plan. An Exhibition on the plan proposed cannot fail to be productive of the highest good to the Territories.

The absent minded man is at it again. He had been reading the egg story and decided to try the trick. The first thing to do was to boil the egg. How many minutes? he asked himself, and going to the stove with the egg in one hand and his watch in the other, he dropped the latter in the hot water. Then placing the egg on the table, he sat down to read till the time was up. At the end of five or six minutes he was surprised to see the egg lying there before him, but supposing that he had himself taken it from the kettle and cooled it proceeded to crack and peel it. The consequence may be imagined. Finally he missed his watch. The house was searched high and low and it was not till the following morning that the cook found it in the kettle, where it had been boiled for hours.

## Walseley on the Hill.

The Masons of Prince Rupert's Lodge, Winnipeg, who were also members of the Walseley Red River expedition in 1870, some weeks ago commemorated the latter event by special services, and afterwards corresponded with Lord Walseley, inviting him to revisit the province. The following reply was read at the last meeting of the lodge:—"Dublin, 16 March, 1894.—Worshipful Master and Brother,—Your letter has duly reached me, and I beg that you and the brethren of your lodge will kindly accept my best thanks for having remembered me at your late meeting. I shall always look back with the deepest pride to having been associated with those gallant Canadians who contributed in 1870 to the creation of your splendid province. I should indeed enjoy a visit to your city were that possible at present, but whether I can or cannot ever do so, it will always be a real pleasure to hear of its progress, its prosperity, and its loyalty, and that our ancient craft flourishes there. The Red River expedition was my first independent command, and I gratefully remember the fine spirit that animated the Canadian soldiers that took part in it. I should very much like a photograph of those brethren who helped me so effectively in 1870. Wishing your lodge peace, love, and harmony, and its members all happiness. I have the honour to remain, Worshipful Master your obedient servant and brother. (Signed), Walseley, General, and Worshipful Master of the Military Lodge of Ireland." The photograph has been prepared as requested, and will be forwarded in a few days.

## The Laureate Discrowned.

For many years past Mr. Louis Frechette has been looked upon by the majority of his countrymen as the leading French-Canadian poet of Canada. His works having been crowned by the French Academy, and the title of Laureate having been conferred upon him by the Institute of France, it would not have occurred to the average mind to doubt the justice of these distinctions. But that a great reputation is at times only a highly-colored bubble seems to be borne out in the case of Mr. Frechette, if the charges made against him by his countryman and rival poet, Mr. William Chapman, are to be taken seriously. Mr. Chapman has just published a volume entitled, *Le Laureate*, the burden of which is the exposure of Mr. Frechette's literary methods, the pricking of his gorgeous bubble, so to speak, until nothing is left of his brilliant reputation but the peevish smell of soap-suds. The main charge brought against the "Laureate" by his gifted contemporary is that of wholesale plagiarism from the works of Victor Hugo, of Cremazie, of Chapman himself, and of several other poets of distinction. The accusation is supported by so many quotations that, placed beside the original lines from which they are alleged to have been stolen, the whole makes up quite a bulky volume, and constitutes an array of evidence against the "Laureate" which can hardly fail to stagger the confidence of his most ardent admirers. Mr. Chapman confesses to having been of the number of these in his early years, and it is, therefore, all the more deeply interesting to follow up the history of his change of opinion, from the period of his first uncomfortable doubts until the final one of irrefragable conviction concerning the unworthiness of Frechette to wear the laurel crown. Mr. Chapman defends his motives in thus systematically and laboriously undermining Mr. Frechette's literary reputation by explaining that he considers it a duty to open the eyes of his countrymen to the hallucination under which they have labored so long, and to remove from his country the reproach of permitting herself to be represented at home and abroad by one who, in his judgement, is utterly unfit and unworthy of such an honor.

It would be rash for any one not thoroughly acquainted with the respective merits of the two poets to attempt to decide which of the two has the greater claim to the honors of precedence; or, leaving comparison out of the question, even to pronounce definitely on the justice or injustice of Mr. Chapman's allegations. The present writer has no intention of trying to adjudicate on such a difficult question, but if an individual opinion has any force in pointing to a conclusion, is willing to confess that frequent and careful perusal of a number of the Laureate's most popular effusions failed to reveal to the said writer any such indications of intellectual greatness as might reasonably be expected to *sauter aux yeux* in the works of a man who had arrived almost at the pinnacle of literary reputation.

It happens rather unfortunately that the French literature of Canada is little read by the English-speaking population, hence few of the latter are qualified to express an opinion on this weighty matter, or are even faintly interested in its issue. To the French population, however, the question raised is one of the first importance, and, no doubt, the controversy will be long and bitter. It seems almost impossible to defend Frechette in the face of the substantial evidence collected against him by Mr. Chapman, and yet to acknowledge the justice of the latter's criticisms involves on the part of critics the humiliating confession that, for a number of years past, they have been imposed upon by the work of a plagiarist. The attitude which prominent writers will take with regard to this controversy is just now a question of keen interest and speculation in literary circles.—Once a Week.

## Salvation Army Jubilee.

The friends and soldiers of the Salvation Army throughout the world are celebrating 1894 as a Jubilee Year, being the fiftieth since General Booth commenced his life-work for God and humanity. The anniversary is to be celebrated by the inauguration of fifty practical schemes—one for each year of the semi-centenary—having for their object the improvement of the

social, physical and spiritual condition of the people. The whole of the schemes represent an outlay of \$130,000, of which \$45,000 is to be raised at once. In answer to the question, "how is this to be raised?" the programme of the celebration says, that every officer, soldier and friend will be asked to send a message to the General on the occasion of the jubilee fund collections, which will be made on Saturday, Sunday and Monday, June 2, 3 and 4. The annual congress will be held in Toronto on Wednesday, June 13, to Thursday, June 31.

## CARD.

I desire to inform the public that the almost indiscriminate distribution of Lumber and building material from my yard, which has taken place since Oct. 1888, came to an end on 1st of JANUARY, 1894, owing to circumstances not wholly within your control or mine.

In future a full stock of the best will be kept and sold for CASH and CASH ONLY, except to Builders and Contractors, who can arrange for short credit at reasonable rates.

All parties who in the past agreed to pay by monthly instalments must in future keep up their payments or deal with my Solicitor.

Thanking past customers for their confidence and support, I am, gentlemen, your obedient servant,

H. McDougall

## STRAY BITS.

A four-legged chicken is a Wymore, Neb., curiosity.

The new uniform is to be abandoned by the Fifth Army.

New Yorkers devour a million quarts of ice cream on a Sunday.

In London the women are beginning to wear the single eyelash.

My friend's father has about seven years in arrears to the traffic in heavy.

The faculty of the chameleon line of changing its color has been attributed to the protective instinct of the animal, by which it seeks to render itself less obtrusive by assuming the color of the background on which it lies.

The tramp on the back of the tramp is an accumulation of a peculiar species of fat, which is a store of nourishment and is provided against the day of want, to which the animal is often exposed. The rapidly acquired or earned can exist for a long period upon this fat without any other food.

Parrots themselves must observe good manners, or they cannot expect them of their children. And a certain length of time should be devoted to each meal—at least twenty minutes to breakfast and lunch or tea, and thirty to dinner. The rapidly acquired or earned can exist for a long period upon this fat without any other food.

The horse has no eyebrows. The appearance of much white in the eye of a horse indicates a vicious nature.

The stork is partial to kittens as an article of food, and finds them an easy and whole prey; and the cats reciprocate by a love for young storks.

The frog, owing to its peculiar structure, cannot breathe with the mouth open, and if it were forcibly kept open the animal would die of suffocation.

Whalebone is found in the mouth of the whalebone whale, where it forms the substance for the teeth, of which otherwise the animal is destitute.

Pigs are poor swimmers, their forelegs being set closely under them, and when they fall into the water they sometimes cut their throats with the sharp points of their cloven feet.

The eyes of hares are never closed, as they are supplied with the eyelids. Instead thereof they have a thin membrane, which covers the eye when asleep, and probably also when at rest.

The deer is furnished with supplementary breathing places in addition to the nostrils, and this would appear to be an extraordinary provision of nature giving the deer the best of the chase a free respiration.

Some very dressy jacks are made in the shape of a single-breasted frock, which may be thrown back, disclosing a lining and vest of broad cloth.

An effective toque of black velvet has a square of jet interlaced with pink velvet ribbon, pink and black velvet roses, and strings of pink velvet ribbon.

The Russian coat, of cloth, lapped to the waist, with deeply rolled collar and deep pointed cuffs of fur, is likely to be as popular the coming winter as last year.

Jackets of seal skin, or vests of natural seal, leopard or white lamb skin, with revers of seal, and still others have caps of Persian lamb, which begin at the top of the sleeve and fall in tabs down the front below the waist.

A novel idea in seal skin garments is a Russian circular, with fitted neck and straight circular front with armholes. The trimming is Persian lamb, which laps to the waist in front and at the back, then widens again to the feet.

The "orange handkerchief" is new, and may be had in all colors of silk, wool or cotton, and is a most delicate and useful article, with tiny vines and sprays. It will not wash, but is said to clean satisfactorily. At its name implies, it is a novelty for one's use.

The death of Shelley's son, Sir Percy Fitzmaurice Shelley, takes the title out of the post line and it now goes to a cousin. The late Sir Percy was a portly, jovial country squire, having no trace of genius from either his father or mother, though he derived a love for outdoor life from the former.

Isaac Holden, member for Kelghley, York-shire, is the richest man in the English house of commons. As a young man he was for some time an ill-paid schoolmaster. While teaching his pupils chemistry he discovered the principle on which lucifer matches are made. But out of this great invention Mr Holden made no money.

By the death of M. Eugene Bersier, Paris, one of the most famous pulpit orators and preachers, an foremost pastor of the reformed church. Pastor Bersier was well known in the United States, where he spent the earlier years of his career. He was succeeded by a large circle of American acquaintances and friends.

## ANIMAL PECULIARITIES.

Tortoises and turtles have no teeth.

All animals which chew the cud are cloven footed.

Both mandibles of the parrot's beak are movable, but most birds are able to move only one.

The horse has no eyebrows. The appearance of much white in the eye of a horse indicates a vicious nature.

The stork is partial to kittens as an article of food, and finds them an easy and whole prey; and the cats reciprocate by a love for young storks.

The frog, owing to its peculiar structure, cannot breathe with the mouth open, and if it were forcibly kept open the animal would die of suffocation.

Whalebone is found in the mouth of the whalebone whale, where it forms the substance for the teeth, of which otherwise the animal is destitute.

Pigs are poor swimmers, their forelegs being set closely under them, and when they fall into the water they sometimes cut their throats with the sharp points of their cloven feet.

The eyes of hares are never closed, as they are supplied with the eyelids. Instead thereof they have a thin membrane, which covers the eye when asleep, and probably also when at rest.

## Peculiar Marriage Forms.

To eat maize pudding from the same plate, or to eat in any way together, is a widely distributed marriage ceremony. In Brazil a couple may be married by drinking brandy together; in Japan by so many cups of wine; in Russia and Scandinavia it used to be one cup for both. The joining of hands among the Romans and Hindus is common to many parts of the world. In Scotland it is called "hand-fasting" and couples live together after. To sit together on a seat while receiving friends, or to have the hands of each tied together with grass, or to smear with each other's blood, or for the woman to tie a cord of her own twisting around the naked waist of the man, constitutes marriage in one part or another. In Australia a woman carries fire to her lover's hut, and makes a fire for him. In America she lays a bundle of rods at the door of his tent. A Loanga negress cooks two dishes for him in his own hut. In Croatia the bridegroom boxes the bride's ears, and in Russia the father formerly struck his daughter gently with a new whip—for the last time—and then gave the weapon to her husband. Down to the present it is a custom in Hungary for the bridegroom to give the bride a kick after the marriage ceremony to make her feel her subjection. Even with all civilized people the servitude of the bride is clearly indicated.

## THE GREAT SOUTH AMERICAN NERVE TONIC

STOMACH AND LIVER CURE

The Wonderful HEALTH BUILDER & NERVE FOOD

Chronic Diseases are caused by Deranged Nerve Centres at base of the Brain.

THE "discoveries" have absolutely proven that the Stomach, Liver, Lungs, and indeed all internal organs, are controlled by the nerve centres at the base of the brain. The manufacture of SOUTH AMERICAN NERVE TONIC has studied this subject closely for more than twenty-five years, and has lately demonstrated that two-thirds of our Chronic Diseases, are due to the imperfect action of nerve centres, either within or at the base of the brain and not from a derangement of the organs themselves; hence that the ordinary methods of treatment are wrong.

As all know, a serious injury to the spinal cord, will at once cause Paralysis of the body below the injured part, it therefore will be equally well understood, how the derangements of the nerve centres, will cause the derangement of the different organs of the body which they supply with Nerve Fluid or Nerve Force.

The wonderful success of SOUTH AMERICAN NERVE TONIC is due alone to the fact that it is based on the foregoing principle. The use of a single bottle of this remedy will convince the most incredulous. It is indeed, a veritable Nerve Food and Will Relieve in One Day the varied forms of Nervous Disease and Stomach Troubles.

Nervous Diseases.

This class of diseases, is rapidly increasing each year, on account of the great wear our mode of living and labor imposes upon the nervous system. Nine-tenths of all the ailments to which the human family is heir, are dependent upon nervous exhaustion, impaired digestion, and a deteriorated and impoverished condition of the blood. The SOUTH AMERICAN NERVE TONIC is a great nerve food and nerve builder and this accounts for its marvellous power to cure the varied forms of nervous disease, such as Neuralgia, Nervousness, Nervous Prostration, St. Vitus's Dance, Nervous Choking, Nervous Paroxysms, Twitching of the Muscles, Hot Flashes, Mental Despondency, Forgetfulness, Sleeplessness, Restlessness, Nervousness of Females, Palpitation of the Heart, Sexual Weakness, etc., etc.

A SWORN CURE FOR ST. VITUS'S DANCE.

My daughter, twelve years old, had been afflicted for several months with St. Vitus's Dance. She was reduced to a skeleton, could not walk, could not talk, could not swallow anything but milk; I had to handle her like an infant. Doctors and neighbors gave her up. I commenced giving her the SOUTH AMERICAN NERVE TONIC, and the effect was very surprising. In three days she was rid of the nervousness, and rapidly improved. Four bottles cured her completely. I think the SOUTH AMERICAN NERVE TONIC the greatest remedy ever discovered, and would recommend it to everyone.

Subscribed and sworn to before me this May 19, 1887.

CHAS. M. TRAVIS, Notary Public.

A WONDERFUL CURE FOR INDIGESTION and DYSPEPSIA.

Loss of Appetite, Weight and Tenderness in the Stomach, Sour Stomach, Pain in the Stomach, Wind upon the Stomach, Nausea and Sick Stomach, Sick-Headache, Hiccough, Water-Brash, Heartburn, Vertigo and Dizziness, Sleeplessness, Frightful Dreams, etc.

The Stomach suffers more than any of the other organs from disease, because it is taken so many indigestible and irritating substances as articles of food. In its great effort to digest these, it soon becomes weakened and diseased. Under such circumstances, it is not wonderful that so many complain of Indigestion and weak stomachs. When the Stomach fails to digest and assimilate the food, the whole body falls into a state of weakness and decay, for Nature has decreed that the body must constantly receive nutriment through the Stomach, to repair the waste of tissue constantly going on in the system.

The South American Nerve Tonic

Is probably the greatest remedy ever discovered for the cure of all Chronic Stomach troubles, because it acts through the nerve centres. It gives marked relief in one day, and very soon effects a permanent cure. The first bottle will convince anyone that a cure is certain.

WHAT EX-MEMBER OF PARLIAMENT, REUBEN E. TRUX, SAYS.

## A SNAP.

I got it. You can have it. Freeman's Sketch of European History, 416 pages, neatly bound in cloth, 25 cents. This figure wouldn't buy the paper and bind it. That don't concern you, however. I didn't steal them. By mail on receipt of price and 3c. stamp.

If not historically inclined you may want a baby carriage. If our stock don't please you we will show the catalogue and let you pick for yourself. 100 styles to choose from. Hard time prices.

We are agent for the celebrated Brantford bicycles. They are built for service and are high-grade in every respect. Catalogue free on application.

Rev. W. L. Clay leaves for Victoria on Tuesday next.

Dr. McKidd, of Calgary, has returned from his European trip.

A genuine Colorado potato beetle is on exhibition in Wm. Grayson's office.

Rev. M. R. Cunliffe, of Estevan, was visiting Rev. W. E. Brown, yesterday.

D. H. McDowell, M. P. Saskatchewan, spent Sunday and Monday in town.

To RENT—Two rooms unfurnished. Apply at Times Office. 46-t.

Homes, the tramp journalist, has left Vancouver for San Francisco on foot.

Business must be booming at Ferguson's meat market if a brand new delivery wagon is any indication.

Mrs. J. Melhuish returned from Oxford on Saturday last after spending a few weeks with her sister at that place.

Rev. F. B. Stacey will conduct dedicatory services in the new Methodist Church at Buck Lake on Sunday, June 10th.

Ich on human and horse and all animals cured in 30 minutes by Woodford's Sanitary Lotion. This never fails. Sold by W. W. Bole.

Superintendent Perry and son were in town yesterday on their way to Regina. They drove in from Wood Mountain.

Rev. W. E. Browne, Dr. Duncan and T. W. Robinson attended the Anglican Synod at Qu'Appelle on Wednesday.

Mrs. Marston, of Grenfell, and Miss Phipps, of Estevan, spent yesterday in town waiting connection with the Soo train.

WANTED.—A good dining room girl wages \$15 per month. Address, WRIGHT & BLAKE, Portia House, North Portal.

W. D. Cowan, L.D.S., Dentist, Regina, will visit at Moose Jaw Dining Hall on June 4th and 5th, for the practice of his profession.

A. B. Thom, photographer of Winnipeg, will visit Moose Jaw again on Wednesday, June 6th, and will remain until Friday, June 8th. All work finished personally.

We regret to chronicle the death of the infant daughter of Mr. and Mrs. W. W. Bole who died on Tuesday morning. The funeral took place on Wednesday. Mr. and Mrs. Bole have the sympathy of the community in their bereavement.

Heart disease relieved in thirty minutes.—All cases of organic or sympathetic heart disease relieved in 30 minutes and quickly cured, by Dr. Agnew's Cure for the Heart. One dose cures. Sold by W. W. Bole.

Speaking to a Free Press reporter on Wednesday Prof. Robertson said: "At Moose Jaw I met the patrons of the creamery, which has been erected and equipped there, and which will be open to receive milk on Monday of next week. There were a few alterations to be made in the interior conveniences of the building, and now as the patrons have been promised the milk of about 400 cows, I have no doubt it will be a success during the summer."

Lost.—On Monday last a small piece of gold chain having attached a half sovereign and a small small number 11. Anyone finding same will kindly leave at the TIMES Office.

The report of the Dairy Commissioner for 1893 contains letters on the subject of the Moose Jaw Creamery from Prof. Robertson and Mr. Wm. Watson and which appeared in the Moose Jaw Times.

At a meeting of the Junior Lacrosse Club held in R. L. Slater's tailor shop to-night the following officers were elected: Honorary President, A. Hitchcock; President, C. D. Fisher; Sec. Treas., W. A. Sells; Captain, F. Richards; Managing Committee, H. J. MacDonald, J. H. Middagh, J. Findlay and E. Wilson.

See Austin McDonald before you start house cleaning. Kalsomining, paperhanging, painting and room decorating a specialty. The only one who has the improved Germ Killer to wash walls with. 41-D

### A. F. & A. M. Church Parade.

Rev. Mr. Tatham, of Broadview, will preach a sermon to the members Moose Jaw Lodge A. F. & A. M. on Sunday, June 24th.

### Another Landmark Case.

John McCaul, one of the early pioneers of Regina, died on the 25th inst. The deceased was the father of J. A. McCaul of Regina and John H. McCaul of Qu'Appelle.

### Crop Indications.

Reports from the country say the crops never looked as well for this season of the year. The growth has not been retarded by frost or drouth, and everything points to a good crop.

### Salvation Army Meeting.

The Salvation Army will hold a special meeting on Monday evening at which Captain Collett will speak on "The Object and Aims of the Salvation Army." Coffee and light refreshments will be served. An admission of ten cents will be charged.

### Line in Good Shape.

The Chief Engineer of the C.P.R. reports that the line has never been in such condition as it is to-day. As evidence of this he points out that Van Horn's special attained a speed that was equal in every section to sixty miles an hour.

### Magistrate's Court.

G. Gregory appeared before Seymour Green, J.P., on Saturday last charged with disorderly conduct on the C. P. R. platform while No. 2 was standing at the station. He pleaded guilty and was fined \$15 and the costs of the court, or in default thirty days in goal.

### Polo Ponies for Ottawa.

A car load of ponies from Lethbridge consigned to the Ottawa Polo Club was set out at Moose Jaw on Wednesday morning. The ponies were much admired by connoisseurs in horse flesh.

### Delayed in the Mountains.

On Saturday Messrs. G. M. Annable, P. Bonneau and R. H. W. Holt left for the coast with three carloads of cattle. The party, at last accounts, were detained in the mountains by the great washout. A passenger on the east bound train yesterday gives a laughable description of the genial Boniface of the Ottawa toiling along the track carrying an immense armload of hay. The cattle are standing the trip remarkably well.

Farms for rent and for sale near Moose Jaw. To rent on shares if desired, 100 to 200 acres under cultivation, house, granary, water, implements. Must be rented at once. Also desirable town lots in any part of Moose Jaw on reasonable terms. Also lots with stone foundation and double dwelling house for sale. Apply to SEYMOUR GREEN. 43-c

A boon to horsemen.—One bottle of English Spavin Liniment completely removed a curb from my horse. I take pleasure in recommending the remedy, as it acts with mysterious promptness in the removal of horses of hard, soft or calloused hams, blood spavin, splints, curbs, swellings, stifles and sprains. GEORGE ROBB, Farmer, Morkham, Ont.

Sold by W. W. Bole.

Relief in Six Hours.—Distressing Kidney and Bladder diseases relieved in six hours by the "NEW GREAT SOUTH AMERICAN KIDNEY CURE." This new remedy is a great surprise and delight to physicians on account of the exceeding promptness in relieving pain in the bladder, kidneys, back and every part of the urinary passages in male or female. It relieves retention of water and pain in passing it almost immediately. If you want quick relief and this is your remedy. Sold by W. W. Bole.

### Luciano's Confession.

The Moosomin Spectator publishes the following copy of the confession made by the Italian murderer, Luciano, hanged at Regina. If Luciano had not made this confession his life would probably have been spared:

REGINA GAZ., March 31, 1894.

The Hon. E. L. Wetmore, Judge of the Supreme Court.

Sir—I, prisoner Antonio Luciano, condemned to death, confess to you the truth about the man who was found dead one and a half miles east of Grenfell in June, 1888. I got up to put some ties on the line. One of the ties fell out of my hands and struck Giovanni Petrosella on the head and he died in a few minutes. I pray, sir, to send this confession to the minister of Justice. (Signed) ANTONIO LUCIANO.

### The Diocesan Synod.

The synod of the diocese of Qu'Appelle took place at Qu'Appelle station on Wednesday. There was a large attendance of clergy and laity. Holy Communion was observed at 9:30 o'clock and the proceedings of the synod commenced at 10:30. Bishop Burn entertained the members at lunch in the Queen's hotel at 1 o'clock. The afternoon session lasted until 5:45, after which those present sat down to a delightful tea provided by the ladies guild. After tea all repaired to the pro-cathedral for evensong. An earnest and impressive sermon was preached by the Bishop. The ladies' guild held a social reception in Immigration Hall in the evening, where a most enjoyable time was spent with music and dancing.

### Hotel Licenses for 1894.

A meeting of the license Commissioners of District No. 4 was held in the Council Chamber, Regina, on Friday, May 25th, to consider the applications for licenses for the ensuing year. The following were granted licenses:—Indian Head, A. McIntosh, A. Davidson; Fort Qu'Appelle, R. Smith; Qu'Appelle Station, Love & Raymond, application of Whiffen & Barnes held over for consideration at an adjourned meeting, Friday, June 1st. The application of Hilliard and Chambly, of Balgonie was also held over. Regina, Chas. Howson, F. Nash, W. McFerrer, Mrs. Arnold, hotel licenses, J. E. Howson, wholesale; Moose Jaw, J. H. Kerr, R. H. Holt, hotels, A. Smith, beer license, Octavius Field, wholesale.

### Alberta Coal for the Navy.

The H. W. McNeil company, of the Anthracite and Canmore mines, are shipping a lot of 200 tons of coal to the British navy at Esquimaux, on an order from the admiralty office in England. Coal to be used on British warships must be smokeless, for the obvious reason that a man-of-war does not want to leave a long trail of black smoke from her stacks. The coal now used at Esquimaux comes from Wales, and no other coal has been found in the British empire that will cover this point except at Canmore and Anthracite. This coal also fills the requirements of a high percentage on carbon. The Vancouver island coals carry from 50 to 54 per cent. fixed carbon, the Canmore coal 76 and Anthracite 90 per cent.

### DEED.

BOLE.—On Tuesday, July, infant daughter of Mr. and Mrs. W. W. Bole, aged 6 months and 19 days.

### NOTICE.

The annual meeting of the Moose Jaw Cemetery Company will be held in Russell Hall on June 4th 1894 at 10 o'clock.

J. E. ANNABLE, Secy.

### ICE CREAM PARLOR!

The undersigned begs to announce that she has opened out a first class Ice Cream Parlor in connection with the hotel. First class furnished rooms to rent.

Mrs. D. MORRISON, Aberdeen Hotel.

### \$10 REWARD!

The above reward will be paid to any person giving information that will lead to the recovery of one bright bay mare, 3 years old when last seen had small cut on breast. Also one bay mare 2 years old.

50c 8 E. RATHWELL.

### STRAYED

On to the premises of the undersigned one bay pony with hobble on one leg. Owner can have same by proving property and paying expenses.

NAISMITH & WYSE, Eye Brow Lake.

### BULL FOR SERVICE

That thorough-bred Durham bull "Bangor," 16305 (Donation Short Horn Herd Book). For \$2.00

FRED W. GREEN Sec 32-16-57.

## M. J. MacLeod.

# HATS! HATS! HATS!

Our stock in Men's, Boys' and Childrens FELT and STRAW HATS is very large, PROBABLY TOO LARGE, and as we would like to reduce them we will now let the people have the benefit of what we call BIG SNAPS or REAL BARGAINS. We have Men's Felt Hats from 40c up and Straw Hats from 5c. up. Our stock in the latest styles in Fedoras and Christies is complete.

Goods sold at cash prices for eggs.

## M. J. MACLEOD.

English Spavin Liniment removes all hard, soft or calloused Lumps and blemishes from horses. Blood Spavin, Curbs, Splints, Ring Bone, Sweeney, Stiffles, Sprains, Sore and Swollen Throat, Coughs, etc. Have \$50 by using one bottle. Sold by W. W. Bole.

Rheumatism Cured in a Day.—South American Rheumatic Car for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. 75 cents sold by W. W. Bole, Druggist.

### TO FARMERS AND OTHERS.

On or about June 1st N. Wallwork, of Lethbridge, will arrive in Moose Jaw with a band of general purpose Horses for sale or trade for cattle.

### PUBLIC NOTICE.

After June 1st all accounts for water must be paid every two months.

49-t.1. ARMSTRONG & McDONALD.

### FOUND!

A Black Mare, weight about 800 lbs. Owner can have same by calling and proving property.

F. J. MURRAY, 49-a

### STRAYED!

On to my premises, the N.W. 24, 17, 28, W. 2nd M., one light bay mare, about 2 years old, white star on forehead, no brand. Owner can have same by proving property and paying expenses.

JAMES PORTER, Moose Jaw, May 21st, 1894.

### STRAYED!

From Regina Barracks, a roan pony mare, aged 5 years, three parts clipped, white star on forehead, hind feet white, sore on left heel, short tail and small mane. Wore a brown leather halter. Any person finding her and returning her to Constable F. Bayliss will be suitably rewarded.

JAMES ALLMARK, Regina, May 7th, 1894.

### PRAIRIE HIRES.

### PUBLIC NOTICE.

The Council of the Moose Jaw Board of Trade, on account of prairie fires occurring so frequently and attended with disastrous results, hereby request all parties who are cognizant of the origin of a prairie fire to make a declaration before a Justice of the Peace setting forth the facts of the case fully, and that the J. P. make a return of such declaration to this Council.

By order, SEYMOUR GREEN, Sec'y.

### \$10.00 OFFERED

For recovery of 3 working horses now at large. When last seen in Regina District was going west when a two of them came.

Large Canadian horse bay, 4 years old, weight 1300 lbs., star in face, white hind legs, snow flake marks over hips, collar marks.

Brands on left hip H H

Smaller iron-gray Broncho mare, halter, bit, and long rope on, weight 600 lbs, brand on left hip H, also on left shoulder W F.

FRED WHITEHEAD, Biggley Post Office.

North of Qu'Appelle Station. 48-t

### IMPORTANT

TO PERSONS WITH

### IMPAIRED SIGHT!

I have this day purchased a complete line of E. LAURANCE'S Spectacles and Eye Glasses, to suit every sight. I use for fitting B. Laurance's tests, and I am in a position to assert that I can fit any person whose sight is impaired. These celebrated Spectacles will be sold at Eastern Prices.

W. W. BOLE.

## NOTICE.

THE following is a summary of the Regulations with respect to the manner of recording claims for MINERAL LANDS other than Coal Lands, and the conditions governing the purchase of the same.

Any person may explore vacant Dominion Lands not appropriated or reserved by Government for other purposes, and may search therein, either by surface or subterranean prospecting, for mineral deposits, with a view to obtaining a mining location, for the same, but no mining location shall be granted until actual discovery has been made of the vein, lode, or deposit of mineral or metal within the limits of the location of claim.

A location for mining, except for Iron, shall not be more than 1,500 feet in length, nor more than 600 feet in breadth. A location for mining Iron shall not exceed 180 acres in area.

On discovering a mineral deposit any person may obtain a mining location, upon marking out his location on the ground in accordance with the regulations in that behalf, and filing with the Agent of the Dominion Land for the district, within sixty days from discovery, an affidavit in form prescribed by Mining Regulations, and paying at the same time an office fee of five dollars, which will entitle the person so recording his claim to enter into possession of the location applied for during the period of one year. The entry will be renewed from year to year provided the sum of one hundred dollars at least has been expended in actual mining operations on the claim within each and every year.

At any time before the expiration of five years from the date of recording his claim, the claimant may, upon filing with the Local Agent, the fee he has expended \$500 in actual mining operations on the claim, by paying to the Local Agent therefor \$5 per acre, cash, and a further sum of fifty dollars to cover the cost of survey, obtain a patent for said claim, as provided in the said Mining Regulations.

Copies of the Regulations may be obtained upon application to the Department of the Interior.

A. M. BURGESS, Deputy of the Minister of the Interior, Ottawa, July 1890. 2c.

### North West Territories.

All even-numbered sections of Dominion Lands in Manitoba or the North-West Territories, except 8 and 26, which have not been homesteaded, reserved to provide wood lots for settlers, or other purposes, may be homesteaded by any person who is sole head of a family, or any male over eighteen years of age, to the extent of one quarter section of 160 acres, more or less.

### ENTRY.

Entry may be made personally at the local land office for the District in which the land to be taken is situated, or if the homesteader desires, he may, by application to the Minister of the Interior, Ottawa, or the Commissioner of Dominion Lands, Winnipeg, receive authority for some one to make entry for him. A fee of \$10 is charged for an ordinary homestead entry; but for lands which have been occupied an additional fee of \$10 is chargeable to meet inspection and cancellation expenses.

### HOMESTEAD DUTIES.

Under the present law homestead duties may be performed in the following way, namely, by three years' cultivation and residence, during which the settler may not be absent more than six months in any one year without forfeiting the entry.

### APPLICATION FOR PATENT

may be made at the end of the three years, before the local agent, or the homestead inspector. Before making application for Patent the settler must give six months' notice in writing to the Commissioner of Dominion Lands of his intention to do so. When, for convenience of the settler, application for patent is made before a homestead inspector, a fee of \$5 is chargeable.

### INFORMATION.

Newly arrived immigrants will receive at any Dominion Lands Office in Manitoba or the North-west Territories information as to the lands that are open for entry, and from the officers in charge, free of expense, advice and assistance in securing lands to suit them, and full information respecting the land laws, rules, and regulations, and copies of these Regulations, as well as those respecting Dominion Lands in the Railway Belt in British Columbia, may be obtained upon application to the Secretary of the Department of the Interior (Immigration Branch) Ottawa; the Commissioner of Dominion Lands, Winnipeg; Manitoba; or to any of the Dominion Lands Agents in Manitoba or the North-West Territories.

A. M. BURGESS, 2c. Dep. Min. of the Interior.

### WHOLESALE
